

UPHOLSTERY CLEANING SERVICE

Upholstery can be very delicate to work with. It is important that you trust only a true professional trained in fabric care to clean your upholstery.

Ernie's Carpet Care is one of the most experienced companies in the area when it comes to upholstery cleaning.

We have a variety of upholstery cleaning techniques. Each fabric will require a different approach.

- We will first test the fabric to determine whether it is colorfast.
- Next we will determine if it is a synthetic or natural fabric.
- We then vacuum the upholstery thoroughly.
- The fabric may require a pre-spray or pre-shampoo. We will work the pre-spray or pre-shampoo into the fabric with an upholstery brush or towel to suspend the soil.
- We use everything from completely water-free pre-sprays to very aggressive ones for durable fabrics.
- At this point we are ready for extraction cleaning. A hot water extraction at low vacuum is used to thoroughly rinse the fabric.
- The final step is to put high velocity air movement on the furniture to insure proper drying.

FABRIC PROTECTION

As with carpet, upholstery will last longer and stay cleaner with a protective coating. Our upholstery protector concentrates on spillage, slowing down the penetration into fabric. Our technicians are prepared to apply this product for you immediately after your upholstery is cleaned.

LEATHER UPHOLSTERY

Leather upholstery requires special care to prevent leather from becoming hard and cracked. We use products formulated just for leather upholstery. These products clean most stains and soiling from leather. They penetrate the surface to clean without harming the leather. We can also apply protectant to help repel stains and soil while keeping your leather soft and supple.
